KALAS SPORTSWEAR

KALAS Sportswear is a leading manufacturer and distributor of premium cycling apparel throughout Europe. We are the custom cyclewear experts, producing top quality kit in your own printed design. We also produce customised wear for other sports including triathlon, skiing and running. As well as custom ranges we also have an extensive range of standard collection wear.

CHAMPIONS WEAR KALAS

KALAS Sportswear are the choice of World and Olympic champions, national and professional teams as well as many thousands of cyclists across the globe.

KALAS Sportswear customisation is extremely popular and has become the trusted supplier for some of the world's leading companies such as Budweiser Budvar, Dulux, Marks & Spencer, Bayer, Skoda and Subaru.

TECHNOLOGY & EXPERIENCE

We travel the globe exploring the most advanced machinery, fabrics and manufacturing technologies. Japan for the Mimaki digital plotter; Italy for the specialist inks and Monti Antonio irons; and Switzerland for the sublimation paper. Our fabrics are also sourced from Italy and Switzerland.

We place the very best technology in the hands of our vastly experienced technicians who meticulously design, print, cut and construct KALAS cyclewear. Every step of the process, from warehouse to dispatch is housed under a single roof at our company headquarters in Tabor, the Mecca of Czech cycling.

REFERENCES

Customised design is used by:

- clubs and teams
 - who want to show their loyalties
- family and friends
 - who want to celebrate an event and share an experience
- companies
 - who want to promote their products or brand

PRO collection

Premium quality customised production of cycle clothing made from revolutionary fabrics in a professional racing design.

Made for professionals

Hit the roads in style. At KALAS, we strive for excellence. We've enlisted pro-cyclists to help us develop this collection. Professional cycling teams from all over the world wear KALAS PRO collection. The clothing is made exclusively from top quality lightweight high performance fabrics that deliver a real competitive edge without compromising comfort.

Aerodynamic design

KALAS PRO collection has a streamlined design and a skin-tight anatomical cut. You will look and feel like a pro when wearing our top of the range collection.

Innovative features

KALAS PRO is packed with revolutionary features. Ultra lightweight clothing comes with embedded elastic bands on the sleeves and legs to provide a tight and comfortable fit.

aerodynamic fit to give you that competitive edge

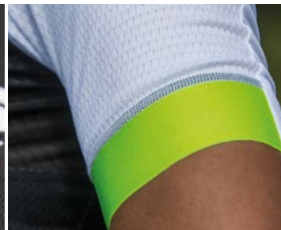

embedded elastic bands on legs and arms for increased comfort

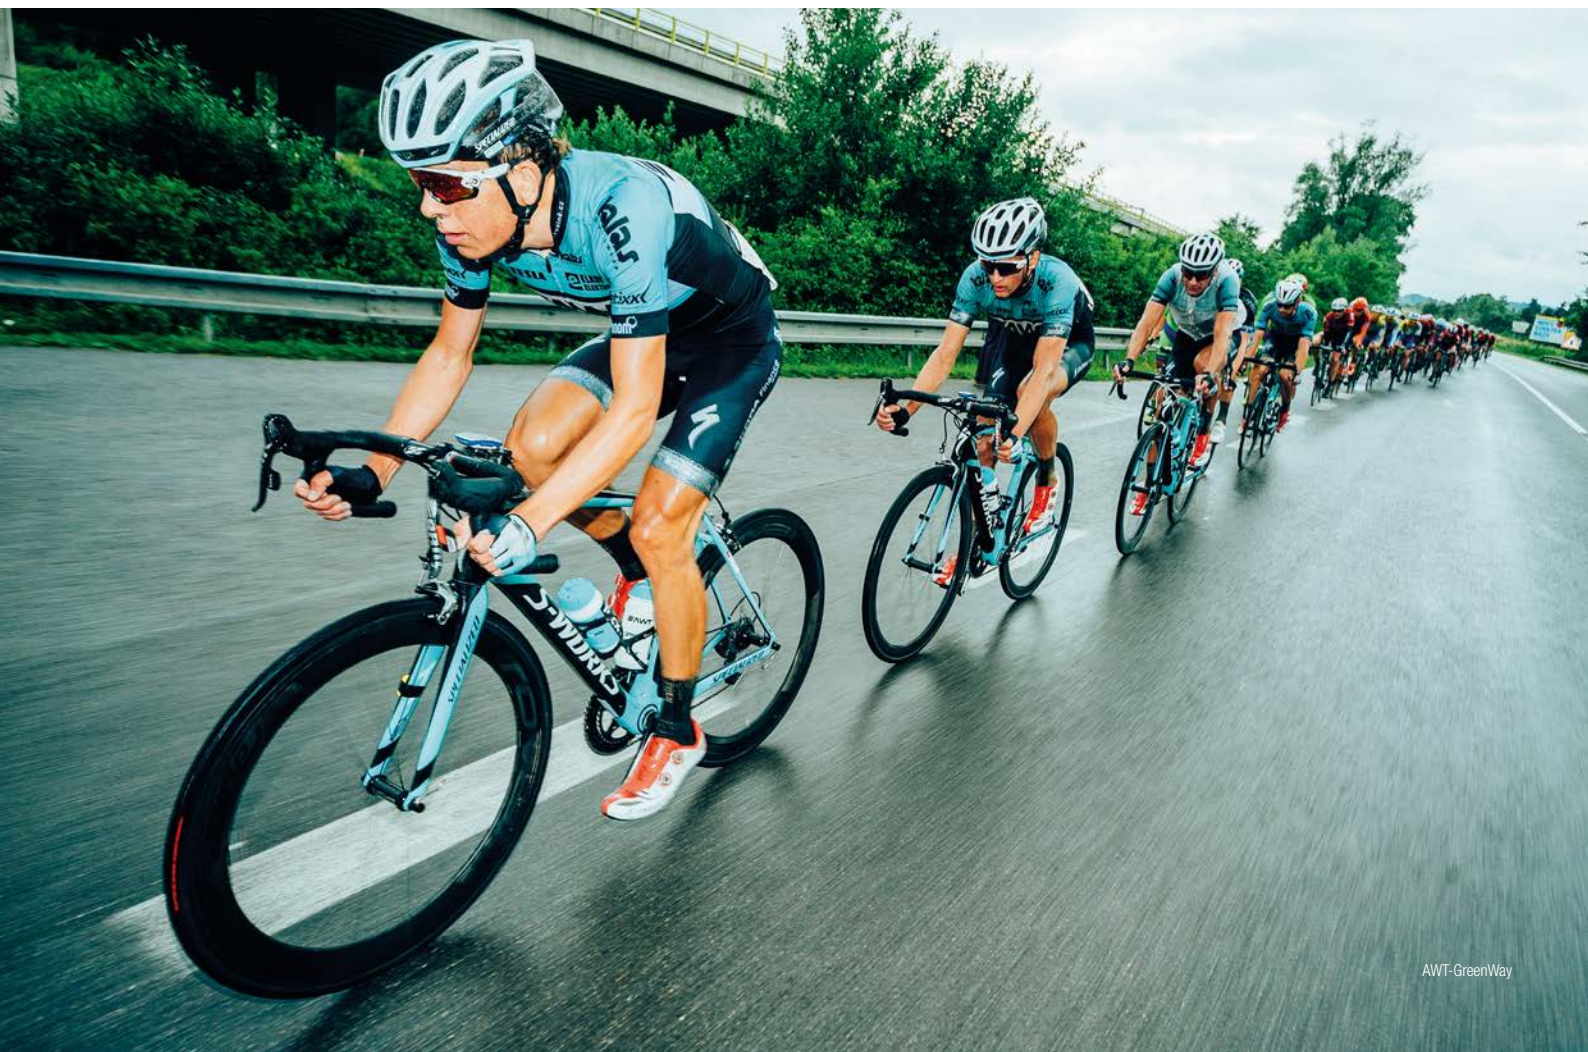

silicone strip

fabric with a carbon fibre mixture improves temperature moderation efficiency

reflective features for added visibility

Carbon X Jersey

 20/30 °C

The result of active collaboration with professional teams is a new aerodynamic jersey made from highly breathable fabrics combined with a mixture of carbon fibre. The elongated sleeves give increased aerodynamics and are finished with embedded elastic sleeve ends for added comfort.

- fabric inter woven with carbon fibre to improve temperature moderation efficiency
- elongated sleeves finished with “fullgrip” elastic band that is stitched with reflective flatlock seam for added visibility
- mesh inserts under the sleeves ensures breathability
- three rear pockets with a small opening for an earpiece cable for a race radio
- inner removable water-resistant pouch for your phone or wallet (optional)
- full length hidden zipper provides continuity of your design

MATERIAL: Carbon X

n51073-MS31 | new

PRO Brios Jersey

 20/30 °C

The most lightweight and breathable jersey in our new collection. Using premium fabrics in dedicated areas, your body temperature is better regulated without compromising comfort. This jersey will feel like a second skin.

- ultrathin, fast-drying fabric
- combination of two soft mesh fabrics on the back panel
- elastic sleeves for increased comfort
- silicone elastic waistband to prevent your top from riding up
- three back pockets

MATERIAL: Brios

n50075-MS27

Zdeněk Štybar

PRO Elastico Thermo Jersey

10/20 °C

This stylish aerodynamic long-sleeve jersey has been designed at the request of our professional teams. The jersey is made from a light and elastic fabric with brushed fibres on the reverse side for added warmth and a luxurious feel. The great elasticity combined with light weight provides maximum comfort on your training rides.

- mixture of technical elastic fabrics for comfort and warmth
- carbon fibre woven fabric under the sleeves for breathability
- silicone elastic waistband to prevent your top from riding up
- full length hidden zipper provides continuity of your design
- reflective elements for increased visibility

MATERIAL: Elastico Thermo

n50054-ML22

PRO Arco Goffrato Bib-shorts

The new shorts are the result of our active collaboration with professional teams. They are made from the Goffrato fabric, which delivers compressive qualities. A new and meticulously crafted cut provides enhanced aerodynamic performance and ensures maximum comfort when riding.

- compressive and textured Goffrato fabric
- mesh inserts positioned on the back of thighs to provide better elasticity
- elastic bibs constructed with bonded seams for greater comfort and durability
- flat seams to ensure maximum comfort
- anti-slip leg grippers for better fit, stitched with reflective flat seams for increased visibility
- race radio back pocket
- ENDURANCE Plus pad for extended comfort in the saddle

PRO Diamond Winter Jacket

This unique two-layer winter jacket, constructed from a water-resistant membrane fabric is designed for those who ride in extreme cold conditions. The pliable membrane fabric offers a selective barrier against certain unwanted external elements, whilst remaining breathable on the inside to prevent overheating. A close fitting cut gives less wind resistance, while the drop tail offers protection from the wet. These features provide maximum protection against the elements while sitting comfortably in the saddle.

- innovative membrane water-resistant fabric
- full length hidden zipper with neck guard
- three compartment back pocket
- reflective elements for higher visibility on the roads
- waterproof Rating >10 000 mm
- breathability >11 000 g/m²/24hrs

RainMem collection

For the determined cyclist

Do not let the miserable weather conditions spoil your plans for training rides. Stay warm and stay dry with our new breathable membrane that regulates your body temperature. With our new RainMem Collection you will be perfectly equipped for riding on rainy and chilly days.

Membrane fabric

KALAS RainMem is the original printable membrane cyclewear that is wind and water-resistant - as well as highly breathable. The extended rear panel of the jerseys ensures maximum protection from the elements for your back and great comfort on the bike no matter what the weather throws at you.

superelastic and insulated membrane material

reflective elements for enhanced visibility

extended rear panel to shield from the wet

legs and sleeves finished with elastic bands for added comfort

PRO RainMem Jersey

An original and revolutionary innovation in cyclewear development. Created in a close-fitting cut and water-resistant membrane fabric, this jersey is designed for chilly and rainy weather and will ensure maximum protection and comfort without costing you any speed.

- superelastic and insulated membrane fabric
- waterproof rating: >10 000 mm
- breathability: >11 000 g/m²/24hr
- elongated back cut for better protection against the elements
- elastic sleeves finished with “fullgrip” elastic band that is stitched with reflective flatlock seam
- silicone elastic waistband to prevent your top from riding up

PRO RainMem Jersey

This jersey can give you a competitive advantage over your rivals. Neither snow, nor rain will discourage you from putting in those vital early training miles of the winter season. This long sleeved membrane cycling jersey keeps you warm and protected from the elements even in the most unfavourable weather conditions. For added comfort the membrane fabric features exceptional breathability.

- elastic and insulated membrane fabrics
- waterproof rating: >10 000 mm
- breathability: >11 000 g/m²/24hr
- water-repellent and wind-resistant
- high collar serves as a protection for your neck
- reflective elements for increased visibility

MATERIAL: RainMem

PADS

MEN

ENDURANCE Plus

Revolutionary pad made using ELASTIC INTERFACE TECHNOLOGY® provides maximum protection and incredible comfort during even the longest and most demanding rides.

Benefits:

- unique anatomic shape developed in conjunction with professional riders
- specially shaped ultra-high density foam inserts for maximum support in the riding position
- carbon fabric – E.I.T. Carbonium – a combination of microfibre and carbon fibre for maximum thermo regulation
- antibacterial fabrics
- perforated foam pad enabling increased breathability and faster drying
- designed to help preserve normal blood circulation and protect the sciatic nerve

ZOOM X

All-round pad made using ELASTIC INTERFACE TECHNOLOGY®, developed to provide a high degree of protection and comfort.

Benefits:

- newly developed elastic fabric from microfiber and polyester fibres
- dual density construction guarantees a great degree of protection and comfort
- elastic fabric E. I. T. X-FIFTY – that provides enhanced breathability and air circulation
- antibacterial fabrics
- extremely soft, flexible side wings allowing freedom of movement whilst maintaining an excellent fit
- perforated foam pad enabling increased breathability and faster drying
- designed to help preserve normal blood circulation and protect the sciatic nerve

SPEED Man

Men's pad made using ELASTIC INTERFACE TECHNOLOGY® in a three dimensional design. Guarantees a good level of protection and comfort.

Benefits:

- anatomic three dimensional shape
- dual density construction guarantees a good degree of protection and comfort
- elastic fabric – E.I.T. CUBE – incredibly soft with microfiber and polyester fibres for maximum breathability
- designed to help preserve normal blood circulation and protect the sciatic nerve

WOMEN

ENDURANCE X Lady

Unique pad made using ELASTIC INTERFACE TECHNOLOGY®. Provides maximum protection and incredible comfort during even the longest and most demanding rides.

Benefits:

- women's specific anatomic shape
- specially shaped with high density foam inserts for maximum support in the riding position
- elastic fabric E. I. T. X-FIFTY – that provides enhanced breathability and air circulation
- anti-bacterial fabrics
- perforated foam pad enabling increased breathability and faster drying

SPEED Lady

Women's specific pad made using ELASTIC INTERFACE TECHNOLOGY®, in a three dimensional design. Guarantees a good level of protection and comfort for medium-long rides.

Benefits:

- women's specific anatomic three dimensional shape
- dual density construction guarantees a good degree of protection and comfort
- elastic fabric – E.I.T. CUBE – incredibly soft, anti-bacterial

KIDS

ENDURANCE Kid

Unique elastic pad of the ELASTIC INTERFACE TECHNOLOGY® series specially engineered for children.

Benefits:

- unique anatomic shape specially developed for children
- specially shaped with high density foam inserts for maximum support in the riding position
- elastic material – E.I.T. X-Tract – a combination of microfibre and special two dimensional structure for better thermo regulation
- anti-bacterial fabrics

LITTLE Racer

An elastic, anti-bacterial designed pad designed for children.

Benefits:

- dual density construction
- elastic, anti-bacterial fabric
- unisex use

Cyclewear size (jersey or shorts)	1	2 – 3	4 – 5	6 – 8

IMPORTANT INFORMATION FOR CHOOSING THE CORRECT SIZE:

MENS AND WOMEN'S WEAR – Tops (jerseys, jackets, vests, etc.)

To determine the correct size of the tops, follow the chest size. Your height is only secondary figure. If your size is in between the two sizes, choose bigger one.

MENS AND WOMEN'S WEAR – Tights, shorts

To determine the correct size of shorts, follow the hip size. Your height is only secondary figure. Most shorts and tights are made of highly elastic fabrics to fit closely. For larger sizes, the sizes required for shorts / tights are typically smaller than those required for tops.

CHILDRENS WEAR

To determine the correct size of tops, follow the height of your child. If the chestline is larger than the size specified by the body height, choose the larger size based on the chestline.

To determine the correct size of pants follow the waistline. Most tights and shorts are made of highly elastic materials and cuts are designed to be close-fitting.

ACCESSORIES

The size of arm warmers corresponds to the size of tops. The size of knee and leg warmers corresponds to the size of shorts.

If your size does not fit our charts, do not hesitate to contact us, we would be happy to help.

CUSTOM MANUFACTURING PROCESS:

1 | ORDERING

Communication is the cornerstone, especially when something unique is being created. We provide a customised service for every customer and help them to select the appropriate products in accordance with their requirements for materials and cuts. We understand the different needs of companies, Olympic winners and even amateur enthusiasts who occasionally cycle for fun.

2 | DESIGN

A carefully chosen design perfectly complements our precisely processed products. Are you looking for a modern design, retro style or do you simply wish to set yourself apart from the competition? Our twelve graphic designers are keen to help you to prepare a design that will be even better than you have imagined. As soon as everything is approved by the customer the order can go into production.

3 | CUTTING

We use high-quality functional materials from Italy and Switzerland. To ensure absolute accuracy, our fabrics are cut using the most advanced cutting machine - Lectra. We have developed over 1000 patterns in different varieties and sizes to meet customers requirements exactly.

4 | DIGITAL PRINT

To print the sublimation paper we use the Japanese digital plotter Mimaki with a width up to 160 cm and a capacity of 200 shirts per hour, and everything is done in a photographic quality (720 dpi). Using the Swiss paper Jetcol and environment-friendly quality ink from Italy we guarantee the absolute transmission quality graphics on paper. This method of printing is very accurate with a wide range of colours and we can print complex designs and photographs.

5 | SUBLIMATION PROCESS

For printing our fabrics we use the Italian machine - Monti Antonio. During the sublimation process a colourful design is transferred from paper to fabric by heat and pressure. We pay close attention to accuracy, which is essential for the subsequent processing of all pieces of fabric.

6 | SEWING

Ensuring an absolute accuracy and a high level of satisfaction is a commitment to our customers. Therefore, our clothing is sewn directly at the headquarters of our company in Tabor. The sewing room is equipped with the modern sewing machinery Juki, Brother or Rimoldi. However, even the best technology cannot replace the skilled hands of our vastly experienced seamstresses.

7 | THE FINAL INSPECTION AND SHIPMENT

After the sewing is done every product is subject to careful inspection. After that, it is carefully packed and ready for shipment anywhere in the world. We use the services of reputable logistics companies such as UPS, DHL and others.
